**Dr. William Wishard Dies After Sixty Years of Medical Practice**

Dr. William Niles Wishard, for more than sixty years prominently identified with the medical and surgical professions in Indianapolis, died Wednesday night at his home, 2650 North Delaware Street, after an illness of only a few days.

Dr. Wishard, who would have been ninety years old this next birthday, had continued active in his practice until Sunday when he was confined to his home. His condition gradually grew worse.

Funeral services will be held at 2 p.m. Saturday in the First Presbyterian church. Members of the immediate family will attend the private burial at Crown Hill cemetery.

A nationally-recognized authority on the treatment of genito-urinary diseases, Dr. Wishard held a position of marked distinction in the community. Putting his services and those of his father together, the name Wishard has been continuously prominent in Indiana medical circles more than a century.

He was the first physician in Indiana and one of the first in the United States to make an exclusive specialty of genito-urinary surgery, and the first in Indiana to remove the prostate gland—an operation which he successfully performed in 1890. Besides his individual work and prominence as an authority he gave invaluable service to the medical profession in general and especially through his various organizations.

Among other distinctions, Dr. Wishard was affectionately known as the "father" of the Indianapolis City Hospital, was the oldest Wednesday morning.
Work of Dr. Wishard Praised by Friends and Associates

Expressions of praise for the work and character of Dr. William N. Wishard were given today by medical men, other friends and associates. Dr. Wishard died Wednesday night.

Dr. Willis D. Gatch, dean of the Indiana University School of Medicine, said: "Death terminated what is perhaps the most remarkable medical career in the history of the state. Dr. Wishard exerted unusual influence on Indiana doctors for a generation."

Dr. James O. Ritchie, president of the Indiana Medical Society, said: "Dr. Wishard was a leader in the medical world many years and he really was a grand old man of medicine. I know that every medical man feels heartily sorry for his passing."

Dr. George Arthur Prante, pastor of the First Presbyterian church, to which Dr. Wishard belonged, asserted: "Dr. Wishard was one of the grandest Christian gentlemen that I have ever known."

Dr. Cleon A. Nafe, chairman of the executive committee of the Indianapolis Medical Association, stated: "No physician in Indiana ever exerted a greater influence in the progress of medical education and the development of high standards of medical practice than Dr. Wishard.

"He was an international pioneer in the development of his specialty of urology. He leaves a record of achievement as a public citizen and as a physician that endears his memory to all who knew him. He was a truly great citizen and his friends sincerely mourn his departure."

Thomas A. Hendricks, secretary of the Board of State Publicity of the Indiana Medical Association, said: "It has been a privilege to serve as secretary of the Board of Publicity of the State Association under the direction of Dr. Wishard for more than ten years. He had the ability to surmount medical problems in simple, understandable terms for the layman. His spirit will dominate the medical profession in Indiana for years to come."

MESSENGER BOY ROBBED

A colored bandit chose a telegraph messenger boy for a victim Wednesday night.

Paul Henry, age nineteen, 314 East Raymond street, was robbed of five dollars, a money order for $10 and a flashlight by the bandit as he rode a bicycle in the 1300 block in West Sixteenth street. The bandit forced the youth to stop, but apparently had no weapon.

CHURCH TO HOLD ANNUAL FATHER AND SON DINNER

The annual father and son dinner will be held Friday evening in the dining room of the Tabernacle Presbyterian church.

Paul Hancock will be toastmaster and Governor Henry F. Schockwill speak.

Awards will be given for the youngest son and dad and the oldest son and dad present. Football families will be presented by LeRoy E. Allen, director of recreation, to the family of Mr. and Mrs. J. B. Allen, M. E. Byrum, Ralph Waddington, Mr. and Mrs. W. M. Marshall, Mrs. J. L. Lamb, Ralph Woolen, Virgil Moore, James Rice, Reid Rice, Charles Marlowe, Ed Gasper and Joe Hampshire.

J. H. ARMINGTON, Meteorologist.
Dr. William N. Wishard Sr. (right), 89-year-old internationally known Indianapolis physician and surgeon, who died last night in his home, 2050 North Delaware street, made his last public appearance May 15, 1940, when he presented the first volume to the then new City Hospital medical library. Dr. Frederick Taylor (left), chief of the hospital staff, accepted the volume as Dr. Charles W. Myers (center), hospital superintendent, looked on.

Dr. Wishard was a former superintendent of the hospital and made the original draft of the plans of the hospital building, which was completed in 1885. He was a member of the hospital's consulting staff during his long medical career.

Medical School to Honor Dr. William N. Wishard

Senior Class Giving Dinner for Veteran Physician at Hospital.

Honoring Dr. William N. Wishard, who was graduated sixty years ago from the Indiana University school of medicine, the senior class of the medical school will give a dinner tonight in the Riley hospital. Prominent physicians who have been associated with Dr. Wishard in student and professional life will be guests, in addition to officials of Indiana University.

Much of Dr. Wishard's sixty years of service have been in public and institutional work. He was superintendent of the city hospital in 1879, when there was no general hospital in the entire state. He was instrumental in launching a movement, through the Flower Mission at the Old Plymouth Congregational church, to provide a women's and children's hospital and a course of training for nurses.

Dr. Wishard is the son of Dr. W. H. Wishard, who made the first formal effort to obtain a general state hospital. He introduced a resolution in the session of the Indiana State Medical Association in 1868, recommending such a hospital.

Dr. William N. Wishard's son, Dr. W. N. Wishard Jr., now is a practicing physician in Indianapolis.

(Rosamond Photo.)

Known Internationally as Specialist In Field of Urology.

Dr. William Niles Wishard Sr., 89 years old, head of the department of genito-urinary surgery in the Indiana University school of medicine 49 years and known internationally for his work in that field, died last night at his home, 2650 North Delaware street.

Dr. Wishard had practiced medicine in Indianapolis 67 years. He served as superintendent of City Hospital from 1879 to 1887 and was responsible in large measure for building the first modern general hospital in Indiana in 1883 during his administration there.

He was a member of medical organizations in this and other countries and held honorary degrees from five universities and colleges. He had been critically ill since Sunday.

Practiced First In 1874.

Dr. Wishard began the practice of medicine in 1874 in Southport. He obtained his premedical education in the Southport schools and Wabash College. He was graduated from the Indiana Medical College in 1874 and Miami Medical College, now a part of the University of Cincinnati, in 1876. He came to Indianapolis in the latter year.

He began his public service in 1876 as a deputy coroner. In 1879, he became superintendent of the City Hospital and served in that capacity until 1887. He made the original plans of the new hospital which was completed in 1885.

With the co-operation of the Flower Mission, he established the first training school for nurses in Indianapolis. It was the second school for the training of nurses which had been organized west of the Alleghenies.

When Dr. Wishard retired as superintendent of the hospital, he continued for many years as a member of the attending staff of surgeons. Later he became a member of the consulting staff.

Dr. Wishard served as president of the Mississippi Valley Medical Association, the Indiana State Medical Association, the Indianapolis Medical Society, the American Urological Society and the State Board of Health.

He was vice-president of the American Medical Association in 1919; a member of the house of delegates of the association, from 1902 until 1912, and a member of the council of the Indiana State Medical Association.

Was Surgeon General.

From 1890 to 1893 Dr. Wishard was surgeon general of Indiana with the rank of colonel.

Dr. Wishard was a charter member of the American Board of Urology. He was a member of the American College of Surgeons, the American Association of Genito-Urinary Surgeons and the National Urological Society of France.

As chairman of the Indiana State Medical Association's committee on public policy and legislation for more than a score of years, Dr. Wishard wrote the medical practice act and obtained its passage. The law established high standards in the practice of medicine in this state.

Served State Association.

Following his retirement from active legislative work, Dr. Wishard induced the State Medical Association to establish its bureau of publicity, which supplies medical news for more than 300 newspapers in Indiana and surrounding states.

He was chairman of the committee which had charge of the bureau since its inception 18 years ago. He served 42 years on these two important committees of the association. He became a member of the association in 1875.

Dr. Wishard had spent much time abroad and did post-graduate work in New York, Berlin and London. His honorary degrees included an A.M. from Wabash College in 1890; an L.L.D. from the College of Wooster, O., in 1919, and L.L.D. from Indiana University in 1924; a Sc.D. from DePauw University in 1929 and an Sc.D. from Hanover College in 1933.

Born In Greenwood.

Dr. Wishard was born in Greenwood Oct. 10, 1851, the son of Dr. William H. Wishard and Mrs. Harriet N. (Moreland) Wishard. His father, one of the early general practitioners in Indiana, practiced 65 years before he retired when he was 89 years old. He died in 1913 when he was almost 98 years old.

His son attended the Greenwood schools and spent one year in a private school in Tecumseh, Mich., before returning to Southport to complete his high school education there.

During his career Dr. Wishard was a member of the consulting staff of the City Hospital, St. Vincent's Hospital, the old Decaness Hospital and the Methodist Hospital. He retired from active practice two years ago.

"Grand Old Man."

Dr. Wishard, long known as "the grand old man" of Indiana medicine, was honored on the anniversary of his graduation from medical school by the senior class of the Indiana University school of medicine in 1934. Scores of eminent physicians who had been associated with him as students, in practice or as specialists in the genito-urinary field, attended.

He also was honored in 1936 by Phi Rho Sigma, national medical fraternity, at a banquet here.

Dr. Wishard's last public appearance was in May, 1946, when he presented the first volume to the new medical library at the City Hospital.

Was Presbyterian.

Dr. Wishard was a member of the First Presbyterian Church and served as an elder many years. He was a member of the Scottish Rite more than half a century.

Survivors are: the widow, Mrs. Frances Scoville Wishard, to whom he was married in Evansville, in 1886; two sons, Dr. William N. Wishard Jr., of Indianapolis, the third generation of Wishards in the medical profession here, and the Rev. Charles Scoville Wishard of Washington; a sister, Miss Elizabeth M. Wishard, of Indianapolis, who is living temporarily in Colorado Springs, Colo., and three grandchildren, Frances McFurrie, William VanDusen and Susan Scoville Wishard.

Funeral arrangements have not been completed. Burial, which will be private, will be in Crown Hill cemetery. The family has requested that friends do not send flowers.
geons, of Indianapolis, and the Ft. Wayne Medical College were merged into one complete and adequate school, known as the Indiana Medical College—the forerunner of the Indiana University School of Medicine and present medical center in the west part of the city.

Born at Greenwood, Ind., in October, 1831, he was the son of Dr. William H. and Dr. Harriet N. Wishard. His father, one of the most outstanding of the old-time practitioners, died in 1913.

As a boy Dr. Wishard attended the public schools, spent a year in a private school at Tuscumbia, Mich., and finished his high school course at Southport. From there he entered Wabash College, but was unable to complete his literary course because of illness. However, in view of his subsequent attainments, Wabash conferred on him the degree of master of arts in 1891.

In 1871 he entered the old Indiana Medical College, from which he was graduated in 1874, with the degree of doctor of medicine. For a brief time thereafter he practiced medicine with his father at Southport, later continuing his medical education at Miami Medical College, in Cincinnati, which also awarded him the degree of doctor of medicine in 1876. Since that time his home and activities had been centered in Indianapolis.

From 1879 to 1883, Dr. Wishard served as deputy coroner of Marion county.

He was chosen as a member of the National Urological Society of France.

Dr. Wishard was married in May, 1860 to Miss Alice M. Woolen, daughter of the late William Wesley and Sarah Woolen. Mrs. Wishard died in December of that year. In June, 1896, Dr. Wishard married Miss Frances C. Scoville, of Evansville. To them five children were born, three dying in infancy.

Survivors are the widow and two sons, Dr. William N. Wishard, Jr., who followed the example of his father and grandfather in adopting the profession of medicine and surgery, and Charles Scoville Wishard, who is pastor of a Presbyterian church at Summit, N. J.

Dr. Wishard had been a ruling elder of the Presbyterian church of Indianapolis and had served as commissioner of the church general assembly. He was a charter member of the Columbia Club and Contemporary Club and also a member of the Sons of the American Revolution and the Society of Indiana Pioneers.

His maternal grandfather, the Rev. John Robertson Moreland, was a pioneer preacher in Indiana, serving as pastor of the First Presbyterian church in Indianapolis in 1828. He organized several churches in the state and in 1831 went as commissioner to the general assembly of the Presbyterian church in Philadelphia, a journey of six weeks on horseback each way.

Work of Dr. Wishard Praised by Friends and Associates

Expressions of praise for the work and character of Dr. William N. Wishard were given today by medical men, other friends and associates. Dr. Wishard died Wednesday night.

Dr. Willis D. Gatch, dean of the Indiana University School of Medicine, said: "Death terminated what is perhaps the most remarkable medical career in the history of the state. Dr. Wishard exerted unusual influence over Indiana doctors for a generation."

Dr. James O. Ritchie, president of the Indianapolis Medical Society, said: "Dr. Wishard was a leader in the medical world many years and he really was a 'grand old man' of medicine. I know that every medical man feels that in his passing a man was an ideal of his profession is gone."

Dr. George Arthur Frantz, pastor of the First Presbyterian church, to which Dr. Wishard belonged, asserted: "Dr. Wishard was one of the greatest Christian gentlemen that I have ever known."

Dr. Cleon A. Nafe, chairman of the executive committee of the Indiana State Medical Association, stated: "No physician in Indiana ever exerted a greater influence in the progress of medical education and the development of high standards of medical practice than Dr. Wishard."

"He was an international pioneer in the development of his specialty of urology. He leaves a record of achievement as a public citizen and as a physician that endears his memory to all who knew him. He was a truly great citizen and his friends sincerely mourn his departure."

Thomas A. Hendricks, secretary of the Indiana State Medical Association, said: "It has been a privilege to serve as secretary of the bureau of publicity of the State Association under the direction of Dr. Wishard for more than ten years. He had the ability to explain medical problems in simple, understandable terms for the layman. His spirit will dominate the medical profession in Indiana for years to come."
Dr. William Wishard Dies After Sixty Years of Medical Practice

Dr. William Niles Wishard, for more than sixty years prominently identified with the medical and surgical professions in Indianapolis, died Wednesday night at his home, 2050 North Delaware street, after an illness of only a few days.

Dr. Wishard, who would have been ninety years old this next birthday, had continued active in his practice until Sunday when he was confined to his home. His condition gradually grew worse.

Funeral services will be held at 2 p.m. Saturday in the First Presbyterian church. Members of the immediate family will attend the private burial at Crown Hill cemetery.

A nationally recognized authority on the treatment of genito-urinary disease, Dr. Wishard held a position of marked distinction in the community. Putting his services and those of his father together, the name Wishard has been continuously prominent in Indiana medical circles more than a century.

He was first physician in Indiana and one of the first in the United States to make an exclusive specialty of genito-urinary surgery, and the first in Indiana to remove the prostate gland—an operation which he successfully performed in 1890. Besides his individual work and prominence as an authority he gave invaluable service to the medical profession in general and especially through his various organizations.

Among other distinctions, Dr. Wishard was affectionately known as the "father" of the Indianapolis City Hospital, was the oldest living former superintendent of the hospital, and was active in the founding of the Indianapolis Training School for Nurses—the county. He was in general medical practice at the time and conducted autopsies incidental to his office.

He became superintendent of the City Hospital in 1879 and served in that capacity until 1897. As superintendent, much of the surgical work devolved on him. These cases comprised accident surgery, such as reducing fractures and dislocations and performing amputations. At that time little abdominal surgery was done by any one, that branch of surgical science developing later.

Dr. Wishard's interest in urology was inspired in 1879 through an elderly patient in the City Hospital, whose condition required a trocar puncture, which had to be repeated daily. The man died. Post-mortem examination revealed a growth which might easily have been moved. Dr. Wishard realized patient's life might have been saved had he immediately begun an intensive study of such cases. His great study of such cases, his great knowledge of urology developed from this incident.

He later took post-graduate work at the New York Post-Graduate Medical School and Hospital and at the New York Polyclinic and Chicago Polyclinic and became a private pupil of some of the noted medical men connected with these institutions. In June, 1890, he went to Berlin to attend the International Medical Congress. While in Europe he visited the hospitals of Berlin and Vienna and attended clinics in the prominent hospitals in London. He made subsequent trips to European hospitals, acquiring additional technical knowledge and developing greater skill. He later devised improvement of certain important instruments for cauterization and visualization of operative areas.

Obtains New Building.

While superintendent of City Hospital, he obtained the erection of a new building, which was completed in April, 1893, and two additional wings in 1894 and 1895. He later was elected professor of genito-urinary surgery in the old Medical College of Indiana. He had served on the consulting staffs of St. Vincent's Hospital, the old Deaconess Hospital, the Methodist Hospital, the old Bobbs Dispensary and the Indianapolis City Dispensary.

Since 1910 the greater part of his operative work had been done at the Methodist Hospital.

For twenty-four years he was chairman of the committee on public policy and legislation of the Indiana State Medical Association. In that capacity he wrote the law governing the practice of medicine as enacted by the legislature in 1897, and which remains unchallenged except for some minor amendments. He was a member and former president of the Marion County Medical Society and the Indiana State Medical Association. He also was a member of the American Medical Association, the American Association of Genito-Urinary Surgeons, the American Urological Association and the Mississippi Valley Medical Association.
DR. WILLIAM N. WISHARD

Dr. William Niles Wishard, for more than sixty years prominently identified with the medical and surgical professions in Indianapolis, died Wednesday night at his home, 2050 North Delaware street, after an illness of only a few days.

Dr. Wishard, who would have been ninety years old this next birthday, had continued active in his practice until Sunday when he was confined to his home. His condition gradually grew worse.

Funeral services will be held at 2 p.m. Saturday in the First Presbyterian church. Members of the immediate family will attend the private burial at Crown Hill cemetery.

A nationally-recognized authority on the treatment of genito-urinary diseases, Dr. Wishard held a position of marked distinction in the community. Putting his services and those of his father together, the name Wishard has been continuously prominent in Indiana medical circles more than a century.

He was the first physician in Indiana and one of the first in the United States to make an exclusive specialty of genito-urinary surgery, and the first in Indiana to remove the prostate gland—an operation which he successfully performed in 1890. Besides his individual work and prominence as an authority he gave invaluable service to the medical profession in general and especially through its various organizations.

Among other distinctions, Dr. Wishard was affectionately known as the “father” of the Indianapolis City Hospital, was the oldest living former superintendent of the hospital, and was active in the founding of the Indianapolis Training School for Nurses—the first institution of its kind in Indiana and the second in the West.

It was in no small measure under his leadership that the three schools of medicine—the Medical College of Indiana, the Central College of Physicians and Surgeons, of Indianapolis, and the F. Wayne Medical College were merged into one complete and adequate school, known as the Indiana Medical College—the forerunner of the Indiana University School of Medicine and present medical center in the west part of the city.

Born at Greenwood, Ind., in October, 1851, he was the son of Dr. William H. and Dr. Harriet N. Wishard. His father, one of the most outstanding of the old-time practitioners, died in 1913.

As a boy Dr. Wishard attended the public schools, spent a year in a private school at Tecumseh, Mich., and completed his high school course whose condition required a troc puncture, which had to be repeated daily. The man died. Post-mortem examination revealed a growth which might easily have been moved. Dr. Wishard realized patient’s life might have been saved and he immediately began an extensive study of such cases. His great knowledge of urology developed from this incident.

He later took post-graduate work at the New York Post-Graduate Medical School and Hospital and at the New York Polyclinic and Chicago Polyclinic and became a private pupil of some of the noted medical men connected with these institutions. In June, 1890, he went to Berlin to attend the International Medical Congress. While in Europe he visited the hospitals of Berlin and Vienna and attended clinics in the prominent hospitals in London. He made subsequent trips to European hospitals, acquiring additional technical knowledge and developing greater skill. He later devised improvement of certain important instruments for cataract and visualization of operative areas.

OBTAINS NEW BUILDING

While superintendent of City Hospital, he obtained the erection of a new building, which was completed in April, 1888, and two additional wings in 1884 and 1886. He later was elected professor of genito-urinary surgery in the old Medical College of Indiana. He had served on the consulting staffs of St. Vincent’s Hospital, the old Deaconess Hospital, the Methodist Hospital, the old Bobbs Dispensary and the Indianapolis City Dispensary. Since 1910 the greater part of his operative work had been done at the Methodist Hospital.

For twenty-four years he was chairman of the committee on public policy and legislation of the Indiana State Medical Association. In that capacity he wrote the law governing the practice of medicine as enacted by the legislature in 1897, and which remains unchanged except for some minor amendments. He was a member and former president of the Marion County Medical Society and the Indiana State Medical Association. He also was a member of the American Medical Association, the American Association of Genito-Urinary Surgeons, the American Urological Association and the Mississippi Valley Medical Association and had been president of the last two organizations.

He was first vice-president of the American Medical Association in 1910, was a member of the Indiana state board of health from 1890 to 1912 and its president at the time he resigned from the board. In 1906 he was chosen as a member of the National Urological Society of France.

Dr. Wishard was married in May, 1890, to Miss Alice M. Wood, daughter of the late William Wesley and Sarah Wood, Mrs. Wishard died in December of that year. In June, 1896, Dr. Wishard married Miss Frances C. Scofield, of Evansville. To them five children were born, three dying in infancy.

Survivors are the widow and two sons, Dr. William N. Wishard, Jr., who followed the example of his father and grandfather in adopting the profession of medicine and surgery, and Charles Scofield Wishard, who is pastor of a Presbyterian church.
